Abréviations

Abréviations

Load Balancer

- AAS : Average Active Sessions (RDS Performance Insights)
- ACM : AWS Certificate Manager
- AES : Advanced Encryption Standard
- ALB : Application Load Balancer
- AMIs : Amazon Machine Images
- ARN : Amazon Ressource Name
- ASN : Autonomous System Number
- AZ : Availability Zone
- BGP : Border Gateway Protocol
- CDN : Content Delivery Network
- CI : Configuration Item
- CIDR : Classless Inter-Domain Routing (notation réseau en /xx)
- CGW : Customer Gateway
- CORS : Cross Origin Ressource Sharing
- CUR : Cost and Usage Reports
- DAX : DynamoDB Accelerator
- DBA : DataBase Administrator
- DCG : Direct Connect Gateway
- DLQ : Dead Letter Queue
- DNS : Domain Name System
- DR : Disaster Recovery
- EBS : Elastic Bloc Storage
- EC2 : Elastic Compute Cloud
- ECMP : Equal Cost MultiPath
- ECS : Elastic Container Service
- EFS Elastic file System
- EIP : Elastic IP Adress
- ELB : Elastic Load Balancer
- ENA : Elastic Network Adaptor
- ENI : Elastic Network Interface
- ETL : Extract Transform and Load
- GRE : Generic Routing Encapsulation
- IAM : Identity and Access Management
- IGW : Internet Gateway
- JDBC : Java DataBase Connectivity
- KMS : Key Management Service
- MFA : Multi-Factor Authentication
- MPP : Massively Parallel Processing
- NACL : Network Acces Control List
- NLB : Network Load Balancer

- OAI : Origin Access Identity
- ODBC : Open DataBase Connectivity
- PITR : Point in Time Recovery
- RCU : Read Capacity Units (DynamoDB)
- RDBMS : Relational Database Management System
- RDS : Relational Database Service
- RPO : Recovery Point Objective
- RTO : Recovery Time Objective
- S3 : Simple Storage Service
- SAAS : Software As A Service
- SAML : Security Assertion Markup Language
- SD-WAN : Software Defined Wide Area Network
- SNS : Simple Notification Service (service de notification par SMS ou e-mail fourni par Amazon)
- SQS : Simple Queue Service
- SSM : AWS System Manager
- TDE : Transparent Data Encryption
- TLD : Top-Level Domains
- TPS : Transactions Per Second
- VGW : Virtual Gateway
- VIF : Virtual Interface
- WAF : Web Application Firewall
- WCU : Write Capacity Units (DynamoDB)
